

Dr. Rick Kapur is a Research Group Leader at Sanquin Blood Supply Foundation, Department Research, and Principal Investigator, Amsterdam UMC location University of Amsterdam, Landsteiner Laboratory, Amsterdam, The Netherlands.

His lab is focused on unraveling the pathophysiology and improving diagnostics of benign immune-hematological disorders. This includes immune responses to platelets: in immune-mediated thrombocytopenias including the autoimmune disorder immune thrombocytopenia (ITP), and immune responses towards the endothelium in adverse blood transfusion reactions: in Transfusion-related acute lung injury (TRALI).

He currently has over 125 peer-reviewed journal publications, including multiple papers in high-quality journals such as *Blood*, *Science Translational Medicine* and *Haematologica*.
